

Wireless Remote Control Unit (RCU)

The remote control unit can be used to program and control individual lights, groups of lights or all of the lights. The wireless remote control operates in the 433.92 MHz frequency range and does not require registration. It covers a range of more than 100m and it is possible to control more than 4,000 lighting units using one wireless remote control unit. It is safe, convenient and easy to use.

Functions (RCU/WCP):

- Individual lights:
light on/off
raising and lowering
- Lighting groups:
lights on/off
raising and lowering
- All lighting units:
lights on/off
raising and lowering

Auto-stop function:

The lift stops automatically as soon as the pre-programmed maintenance level is reached during lowering

Group control:

Up to 4,000 lighting units can be programmed and controlled together

Industrial Remote Control (WCP)

This remote control unit has the additional option of a dead-man's control switch, individual and visual group control displays.

Can be applied for any company internal key switch system.
